EXPERIENCE

Software Developer Intern, Digital Platforms

Jan 2026 – Apr 2026

Royal Bank of Canada (RBC)

Toronto, ON

- Built Java/Spring Boot REST APIs exposing client account data to **20+** Open Banking partners.
- Shipped a JOSE cryptographic service (JWS/JWE) signing and encrypting payloads across **4** microservices.
- Cut application startup time **80%** via a multithreaded parallel bean loader in Spring Boot.
- Containerized **3** microservices with Docker and deployed to OpenShift OCP 4, tuning Kubernetes pods.
- Parallelized GitHub Actions build, scan, and deploy stages, cutting release cycle time **65%**.
- Raised unit test coverage to **85%** with JUnit and Mockito; traced defects in Splunk and Dynatrace.

Technical Systems Analyst Intern, IAM Analytics & Governance

Sep 2025 – Dec 2025

Royal Bank of Canada (RBC)

Toronto, ON

- Led VICI (Validation of IAM Control Implementation), consolidating **5M+** identity records from **5** systems.
- Built Python/SQL ETL pipelines on a three-stage AWS S3 landing, transform, and curated design.
- Surfaced results in Tableau, cutting control-validation reporting from **3 days** to **under 4 hours**.
- Orchestrated **50+** ETL jobs on Linux VMs via Stonebranch agents, saving **10+ hours** of manual work weekly.
- Enforced least-privilege S3 access across **8+** application codes with IAM policies and bucket segregation.

Machine Learning Engineer Intern

Jan 2025 – Apr 2025

Meta Trading Club

Remote

- Built a React chatbot on the OpenAI API with structured-output parsing, serving **10+** users.
- Engineered Python NLP pipelines classifying personality across **12** trait dimensions at **77%** accuracy.
- Raised classification consistency **25%** through few-shot prompt templates and schema-validated outputs.
- Exposed model inference behind a REST endpoint with input validation, retries, and error handling.

PROJECTS

Fragments | Node.js, Express, Docker, AWS ECS Fargate, ECR, DynamoDB, S3, Cognito, GitHub Actions

- Built a containerized Node/Express microservice on AWS ECS Fargate behind an Application Load Balancer.
- Split storage across DynamoDB metadata and S3 blobs, verifying Cognito JWTs in-service.
- Served **11** fragment types via on-read format conversion, avoiding a second stored copy per format.
- Gated deploys on git tags in GitHub Actions; **80%+** Jest coverage and **14** Hurl integration suites.

DevFlow | Next.js, TypeScript, Supabase, PostgreSQL, Gemini API, Octokit

- Built an AI PR review dashboard pairing GitHub's REST API with Gemini across **100+** pull requests.
- Enforced schema-validated JSON output and per-user Postgres Row Level Security; **sub-2s** cold starts.

DDP Hunt | Next.js, TypeScript, MongoDB, Auth0 | internal tool for RBC Digital Developer Practice

- Led a QR-based scavenger hunt platform run live at an internal RBC event for **30+** employees.
- Built Auth0 role-gated admin tooling with audit logging and leaderboards updating in **under 200ms**.
