EDUCATION

Seneca Polytechnic

Advanced Diploma, Computer Programming and Analysis | **GPA: 4.0/4.0**

North York, ON

Expected Dec 2026

EXPERIENCE

Software Developer Intern, Digital Platforms

Jan 2026 - Apr 2026

Royal Bank of Canada (RBC)

Toronto, ON

- Built **Java/Spring Boot REST APIs** for RBC's Open Banking platform, serving account data to 20+ partners.
- Shipped a **JOSE (JWS/JWE)** service that signs and encrypts API payloads across 4 microservices.
- Cut app startup time **80%** by replacing sequential Spring bean initialization with a multithreaded loader.
- Cut CI/CD release time **65%** by parallelizing GitHub Actions for 3 Docker microservices on OpenShift.
- Raised unit test coverage to **85%** with JUnit/Mockito; traced production defects in Splunk and Dynatrace.

Technical Systems Analyst Intern, IAM Analytics & Governance

Sep 2025 - Dec 2025

Royal Bank of Canada (RBC)

Toronto, ON

- Led VICI (Validation of IAM Control Implementation), building Python/SQL ETL pipelines on a three-stage AWS S3 design that consolidated **5M+ identity records** from 5 enterprise systems.
- Cut control-validation reporting from **3 days to under 4 hours** with pipeline-fed Tableau dashboards.
- Saved **10+ hours** of manual work weekly by orchestrating 50+ ETL jobs on Linux VMs with Stonebranch.
- Enforced least-privilege S3 access across 8+ application codes with IAM policies and bucket segregation.

Machine Learning Engineer Intern

Jan 2025 - Apr 2025

Meta Trading Club

Remote

- Built an LLM-powered React chat app on the OpenAI API with structured outputs, used by 10+ members.
- Raised classification consistency **25%** with few-shot prompts and schema-validated JSON outputs.
- Served model inference through a REST endpoint with input validation, retries, and error handling.

PROJECTS

Fragments | Node.js, Express, Docker, AWS ECS Fargate, ECR, DynamoDB, S3, Cognito, GitHub Actions

- Built a stateless Node/Express REST microservice on **AWS ECS Fargate** behind an ALB with Cognito auth.
- Split DynamoDB metadata from S3 blobs, converting **11 content types** (Markdown, CSV, images) on read.
- Tested with Jest/Supertest (**80%+** coverage) and 14 Hurl suites on DynamoDB Local via Docker Compose.
- Built a GitHub Actions CI/CD pipeline (ESLint, hadolint, multi-stage Docker build) that pushes to Amazon ECR and rolls the ECS service on version tags, with logs streamed to CloudWatch.

DDP Hunt | Next.js, TypeScript, MongoDB, Auth0, Cloudinary | internal RBC event platform

- Pitched RBC a QR-code scavenger hunt originally built for CUSEC, then rebuilt it as lead developer and ran it live for **30+ employees** at a multi-day event, with leaderboards updating in under 200ms.
- Validated every QR scan server-side against the item's activation window and claim cap before crediting points.
- Gated admin, volunteer, and player roles with an Auth0 custom claim; admin edits write before/after audit logs.

DevFlow | Next.js, TypeScript, Supabase, PostgreSQL, Gemini API, Octokit

- Built an AI code review app that sends GitHub PR diffs to Gemini for structured bug reports on **100+ PRs**.
- Enforced schema-validated LLM output and per-user Postgres Row Level Security; sub-2s cold starts on Vercel.

LEADERSHIP & MENTORSHIP

Director of Technology, CUSEC: lead tech for a national software engineering conference

Jan 2026 - Present

VP Technology, GDG on Campus Seneca: led chapter tech and mentored at hackathons

Jan 2026 - Sep 2026

Lead Mentor, Seneca Pre-Arrival Mentoring Program: mentor incoming students

Sep 2024 - Present

SKILLS

Languages: Java, Python, TypeScript/JavaScript, SQL, C++, Bash

Backend & Web: Spring Boot, Node.js, Express, Next.js, React, REST APIs, Microservices, OAuth 2.0, JWT

Cloud & DevOps: AWS (ECS, ECR, EC2, S3, DynamoDB, Cognito), Docker, Kubernetes, OpenShift, Linux

Data & Testing: PostgreSQL, MongoDB, Redis, JUnit, Mockito, Jest, Splunk, Dynatrace

AI Tooling: Model Context Protocol (MCP), AI Agents, Agentic Workflows, Tool Calling, LLM APIs, Claude Code

Practices: Agile/Scrum, GitHub Actions CI/CD, Code Review, System Design, Unit & Integration Testing
