EXPERIENCE

Software Developer Intern

Royal Bank of Canada (RBC)

Jan 2026 – Apr 2026

Toronto, ON

- Shipped a **JOSE-compliant cryptographic service** for Open Banking, securing data via asymmetric encryption and JWT signing across **4** integrated microservices.
- Cut application startup time by **80%** by replacing sequential bean initialization with a multithreaded parallel loader in Spring Boot.
- Containerized **3 microservices** with Docker and deployed to OpenShift via Kubernetes; automated builds in Jenkins CI/CD, cutting deploy cycles from 30+ min to **under 10**.
- Built **DDP Hunt**, a real-time scavenger hunt app (Next.js, MongoDB) with QR-code claiming and live leaderboards — used by **30+ employees** and demoed to senior leadership.

Technical Systems Analyst Intern

Royal Bank of Canada (RBC)

Sep 2025 – Dec 2025

Toronto, ON

- Automated IAM data workflows in Python, cutting access-certification and orphan-account processing time by **40%**.
- Built and optimized SQL pipelines ingesting millions of identity records from **5 enterprise systems**; tuned **15+ slow queries** via index optimization to meet SLA targets.
- Created Tableau dashboards consolidating IAM metrics across **3+ data sources**, reducing manual reporting effort by **8+ hours** per audit cycle.

Machine Learning Engineer Intern

Meta Trading Club

Jan 2025 – Apr 2025

Remote

- Built a React chatbot integrating the OpenAI API with structured-output parsing, serving **10+ users** with real-time personalized responses.
- Engineered Python NLP pipelines using prompt-engineered LLM calls to classify user personality across 12 trait dimensions, achieving **77% accuracy**.

PROJECTS

DevFlow | Next.js, TypeScript, Supabase, Gemini AI, GitHub OAuth, PostgreSQL

- Built an AI-powered PR code review dashboard integrating the GitHub REST API with **Google Gemini**, analyzing 100+ pull requests for automated bug detection and severity ratings.
- Reduced AI generation costs by **60%+** via review caching in Supabase PostgreSQL with Row Level Security; deployed on Vercel with **sub-2s cold starts**.

EmotionSense | Python, TensorFlow/Keras, OpenCV, Flask, NumPy

- Trained a CNN on 35K+ facial images to classify 7 emotions with **75% accuracy**; served predictions via a Flask REST API with CORS-enabled endpoints.
- Implemented multi-strategy face detection using 4 OpenCV Haar cascade configurations with histogram equalization fallback, achieving **92% detection rate** under varied lighting.

SKILLS

Languages: Python, JavaScript/TypeScript, Java, C, C++, SQL, Bash

Backend & APIs: Spring Boot, Spring WebFlux, Node.js, Next.js, Flask, Microservices, RESTful APIs, JOSE/JWT, OAuth 2.0

AI & ML: TensorFlow/Keras, OpenCV, Scikit-learn, OpenAI API, Google Gemini, Prompt Engineering, NLP, RAG

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Redis, Supabase

Infrastructure: Docker, Kubernetes, OpenShift, AWS, Linux, Jenkins, GitHub Actions, CI/CD, Dynatrace, Git

Frontend: React, Tailwind CSS, Streamlit, Three.js, Framer Motion

Practices: Agile/Scrum, Code Review, Unit Testing, System Design

EDUCATION

Seneca Polytechnic

Computer Programming and Analysis | **GPA: 4.0 / 4.0**

North York, ON

Jan 2024 – Dec 2026

Leadership: Director of Technology, CUSEC (Canadian University Software Engineering Conference); VP Technology, Google Developer Group on Campus
